The Tournus PLE1494 commercial anodized aluminum shelving unit is a standing four-shelf food service rack unit with an anodized aluminum square tubing frame and removable polypropylene shelves supporting a 330 lb/150 kg per shelf capacity and a 1,320 lb/600 kg total capacity when the weight is distributed evenly across all shelves. The polypropylene shelves are made of food quality materials, smooth surfaces, with no lumps or nooks so no food matter can get trapped. The shelves can be removed from the frame and machine washed at up to 194 degrees F/ 90 degrees C. They hang over the top part of the horizontal shelf bar, providing a labeling tab, which is writeable with a dry erase marker (included), to help manage food stocks. The horizontal shelf bars lock into protruding rivets on the corner posts for secure and bolt-free attachment at eleven possible positions, enabling custom shelf heights. Corner posts are 30 x 32 mm aluminum square tubing with threaded adjustable levelers for use on uneven surfaces. The aluminum frame is anodized for corrosion resistance. This unit is open on all four sides to facilitate access to shelf contents from any angle. This shelving unit meets NSF International/American National Standards Institute (NSF/ANSI) Standard 2 - Food Equipment requirements for food processing environments, including refrigerators, freezers, and warewashing areas. It is suitable for use, wet or dry, in temperatures from -22 degrees F to +140 degrees F (-30 degrees C to +60 degrees C). The unit measures 69 x 59 x 19-3/4 inches/1,750 x 1,494 x 500 mm (H x W x D). (H is height, the vertical distance from lowest to highest point, W is width, the horizontal distance from left to right, D is depth, the horizontal distance from front to back.) No tools required for assembly, instructional video available online. Standing shelf units are commonly used to store items to help create organized, efficient, and safer work areas. These systems typically consist of a frame or rack with open shelves. Added components such as casters, wheels, or handles are used for applications that require mobility. Standing shelf units are used in a variety of office, industrial, educational, and residential settings. Tournus Equipment manufactures stainless steel equipment for professional kitchens, catering, and fish sales counters. The company, founded in 1910 and headquartered in Tournus, France, meets International Organization for Standardization (ISO) standard 9001.
